60 countries represented

More than **15,000** media fallouts during the event for a total reach of more than **600,000** views on social media and online media**

**Source Talkwalker

TESTIMONIALS

" **François STEPHAN**
Managing Director - ECE

The FIC contributes to showcasing all cybersecurity professions, particularly through the EC2 (European Cyber Cup) competition. Something really needed, since the industry lacks talented staff!

" **Gerome BILLOIS**
Partner - Wavestone

Congratulations to the whole team for this superb event, which stands out for its depth and the breadth of topics addressed!

" **Eric SINGER**
CISO EMEA - Schneider Electric

The FIC has become an unmissable event for peer-to-peer exchanges on current and future cybersecurity issues. We had a round table discussion on IOT in an industrial Context.

" **Pascal STEICHEN**
CEO - SECURITYMADEIN.LU

What is unique about the FIC is this interesting balance between public and private stakeholders, between the research world and the service providers, and between professionals and young innovators. All in a truly European dimension.

" **Thierry TROUVÉ**
Managing Director - GRT GAZ

What a pleasure to meet again in person for this successful edition of the FIC, with the spotlight on 'Cybersecurity for Industry' for the first time. The number of participants, and the density and quality of the exchanges showed the growing importance that manufacturers now attach to the cybersecurity of production systems. A great opportunity to bring in and raise awareness among our OT teams. See you next year!

A MULTIPLE ECOSYSTEMS EVENT
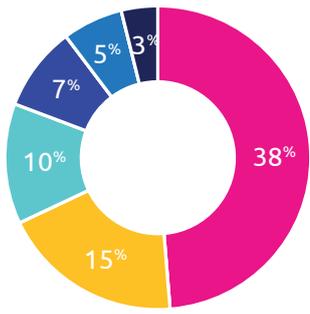

Most represented sectors

---

inCyber
The media channel of the FIC community

A community active all year round with inCyber

- *The FIC Observatory has become inCyber, an international medium dedicated to all cybersecurity issues.*
- A constant monitoring of cyber news
- Numerous written and video content
- Approximately 50 events per year (breakfasts and webinars)
- +55K of subscribers

Agora FIC
Le club des Décideurs du numérique

A committed event organised thanks to the FIC Agora

- The Agora is the think-tank of the FIC. It brings together public and private decision-makers on the strategic challenges of cybersecurity. Through its different work activities and events (clubs, meetings...), it contributes to building the cybersecurity of tomorrow. At the FIC 2021, it presented a new white paper entitled:
- *Making Cybersecurity the Cornerstone of European Digital Sovereignty. 28 key recommendations for the French Presidency of the European Union.*
